## Professional Summary

Computer Science undergraduate specializing in Data Science with project experience in AI-powered applications, data analysis, and IT solutions. Brings presentation, team coordination, and student-support experience, with an interest in understanding client needs and communicating the value of technology solutions. Eager to contribute to business development through clear communication, organized follow-up, and a willingness to learn.

## Education

**University of Petroleum and Energy Studies (UPES)** Dehradun, India
B.Tech. in Computer Science and Engineering (Data Science) Aug 2023 – Present
CGPA: **6.99/10**
**Class XII:** 63% (2021–2022) **Class X:** 88% (2019–2020)

## Core Skills

| | |
|---|---|
| **Communication** | Presentations, interpersonal communication, active listening |
| **Professional** | Team coordination, collaboration, problem-solving, adaptability, time management |
| **Technical** | Python, SQL, JavaScript, HTML, CSS, MySQL, REST APIs, Git/GitHub |

## Experience

**Project Experience – VentureSignalAI, AI Due Diligence Platform — IBM** Jun 2026 – Jul 2026

- Worked on VentureSignalAI, an AI-powered due diligence platform project associated with IBM.
- Gained project exposure to applying AI-enabled technology to a business-focused due diligence use case.

**Fitness & Nutrition Intern – Bulls Fitness Club** Jun 2025 – Jul 2025

- Applied knowledge from a Health Science minor and personal bodybuilding experience to support gym clients working toward individual fitness goals.
- Discussed clients' training routines, fitness objectives, and general nutrition habits, helping them understand practical, sustainable lifestyle choices.
- Used active listening and clear communication to build rapport, encourage consistency, and provide motivation aligned with clients' goals.

**Social Intern – Gulley Classes Foundation** Jun 2024 – Jul 2024

- Supported educational outreach activities, presentations, and coordination with stakeholders.
- Coordinated a 10-member team by helping organize tasks, track progress, and support day-to-day execution.
- Assisted students with questions and learning activities, and contributed to website improvements using HTML, CSS, and JavaScript.

## Projects

**HealthSync AI – Intelligent Health and Fitness Platform**
*Python, React, FastAPI, SQLite, REST APIs*

- Built a health and fitness application concept covering personalized workout planning, diet guidance, and progress tracking.
- Worked across application components and data management to support user-focused features.

**NetSentinel AI – ML-Based Network Intrusion Detection**
*Python, Scikit-learn, NSL-KDD, Flask, Docker*

- Developed a machine-learning approach for network intrusion detection using the NSL-KDD dataset.
- Prepared data-analysis workflows and explored classification methods such as Decision Trees and Random Forest.

**Fitness and Health Data Analytics**
*Python, Pandas, NumPy, Scikit-learn*

- Analyzed fitness, sleep, and weight-related datasets using preprocessing and exploratory data analysis.
- Explored regression for weight prediction and classification for goal-success analysis.

## Certifications

AWS Cloud Practitioner Essentials (2025) — Hugging Face – NLP with Transformers (2025) — Data Science – CodeWithHarry (Ongoing)
